152. Increase of seats inVarious PG Courses course at Sri Ramachandra Medical College & Research Institute, Chennai under Sri Ramachandra University, Chennai u/s 10A of the IMC Act, 1956.

Read: the matter with regard to Increase of seats in various Post Graduate courses at Sri Ramachandra Medical College & Research Institute, Chennai under Sri

Ramachandra University, Chennai u/s 10(A) of the IMC Act, 1956 along with letter dated 01/02/2014 received from the Central Govt.

The Postgraduate Committee considered the matter along with the letter dated 01/02/2014 received from the Central Govt. and decided as under:

1. Postgraduate medical courses are regulated by the MCI in terms of its Postgraduate Medical Education Regulations 2000 framed under provisions of Section 20 read with Section 33 of the Indian Medical Council Act, 1956. These regulations are in addition to the other applicable provisions of the Act and also other regulations framed by the MCI.
2. For achieving an effective regulation on the conduct of PG medical courses and also to achieve uniformity in that regard, it had stood decided through the regulations that there shall be PG Medical Degree Courses or PG Medical Diploma Courses. Through the regulations, duration of PG Medical Degree Courses has been provided as 3 years and with reference to PG Diploma, the duration stipulated was of 2 years. Uniform nomenclatures had also been stipulated and it was thereafter, through the PG regulations, made necessary for every medical college / institution imparting postgraduate medical qualification to follow and adhere to the provisions of the PG regulations of the MCI.
3. Accordingly, in view of the norms laid down by the MCI, the medical colleges / institutions had been seeking permission for starting various PG medical courses both in degree as well as diploma streams and on fulfillment of all the required infrastructural, teaching and other facilities, were being permitted sanction of both PG medical degree seats as well as PG medical diploma seats to be filled by colleges / institutions annually as per the sanction granted to them in terms of Section 10A of the Act and the applicable regulations made thereunder. Thus, a number of medical colleges / institutions had been imparting medical education, as per their sanctioned strength in the PG Medical Degree Courses as well as PG Medical Diploma Courses.
4. As per the scheme of the Act, after the grant of permission u/s 10A of the Act and the applicable regulations made thereunder, on the completion of 3 years of teaching and training for a PG Medical Degree Course and 2 years of teaching and training for a PG Medical Diploma Course, the medical college / institution would apply for issuance of notification u/s 11(2) of the Act for grant of recognition for such PG Medical Degree Courses as well as PG Medical Diploma Courses. On grant of recognition, the medical college / institution remains entitled to the annual sanctioned strength for each of the PG Medical Degree Course and / or each of the PG Medical Diploma Course as per the annual strength permitted / sanctioned u/s 10A of the Act. There is now a provision for renewal of the recognition after every 5 years with regard to every PG Medical Degree Course and / or PG Medical Diploma Course - in terms of the MCI Regulations.
5. On account of the various amendments, which stood carried out in relation to infrastructural, teaching and other facilities for the conduct / imparting of medical education in PG medical courses, Central Govt. / MCI has started receiving applications from the medical colleges / institutions seeking to surrender / stoppage of their PG Medical Diploma Courses alongwith request for consideration by the Central Govt. / MCI of their applications for appropriate increase in their annual sanctioned strength for PG Medical

Degree Courses. Some of such applications have also been forwarded by the Central Govt. to the MCI.

6. Through such applications, the medical colleges / institutions are undertaking to discontinue / stop the admissions in the sanctioned strength for PG Medical Diploma Courses. The Medical Council of India is obliged to consider their request both for surrender / discontinuation of PG Medical Diploma Courses and the request / applications made by them for appropriate increase in the annual sanctioned strength for PG Medical Degree Courses. The MCI has also to consider the effective steps to be taken in this regard for ensuring that the declaration / undertakings of the medical colleges / institutions regarding stoppage / discontinuation of PG Diploma Courses are genuine and are actually implemented.
7. In this regard, it becomes necessary to consider the following:-
 - a. Whenever any medical college / institution applies for permission u/s 10A of the Act and the applicable regulations made thereunder for starting any PG Medical Diploma Course, on the recommendations of the MCI made to the Central Govt., letter of permission / LoP is granted by the Central Govt. with the permissible annual sanctioned strength for each of the PG Diploma Course.
 - b. As observed above, the regulations provide duration of 2 years for the conduct of PG Diploma Course. Thus, when a medical college / institution is granted LoP for starting any PG Medical Diploma Course, it is at the end of the 2nd year that a PG Diploma Medical Course student becomes obliged to take a final exam. At that time, a request is received by the MCI from the medical college / institution through affiliating university for conduct of inspection for the purposes of making recommendations to the Central Govt. for grant of recognition for such PG Medical Diploma Course u/s 11(2) of the Act.
 - c. On the grant of Letter of Permission itself, the sanctioned strength for any PG Diploma Course becomes a part of the seat matrix of the sanctioned seats for PG Diploma Courses in all the institutions prepared and kept by the Central Govt. This seat matrix i.e. the details and number of the sanctioned PG Medical Diploma Course in all the medical colleges / institutions is maintained by the Central Govt. from year to year.
 - d. Similarly, on the grant of recognition for any PG Medical Diploma Course with the annual sanctioned strength, the Central Govt. issues a notification u/s 11(2) of the Act.
8. It would, therefore, deserve to be appreciated that with a view to ensure that there is no duplicacy and that there is valid and legal transition of the surrender / stoppage of PG Medical Diploma seats and there is appropriate increase in the annual sanctioned PG Degree seats, it also becomes necessary that the required action is also taken by the MCI and the Central Govt. in this regard and for achieving this objective, it would also be necessary that a truthful, genuine, binding and enforceable declaration / undertaking is received from the applicant medical college / institution regarding stoppage / closure of the PG Diploma Courses. Simultaneously, it also becomes necessary that the necessary corrections / modification is carried out by the Ministry of Health, Govt. of India in deleting, from the seat matrix, maintained by the Ministry of Health, Govt. of India with regard to the sanctioned PG Medical Diploma seats which are discontinued and / or sought to be discontinued by the medical college / institution and those number of seats are deleted from the seat matrix maintained by the Central Govt. Such deletion with respect to every such applicant medical college /

institution would also be required to be intimated by the Ministry of Health, Govt. of India to the concerned medical college / institution and also to the MCI.

9. Since the concerned applicant medical college / institution discontinues / stops the conduct of PG Medical Diploma Course(s) and submits a declaration / undertaking in that behalf, the Section 11(2) notification, which had been issued by the Ministry of Health, Govt. of India with reference to any such PG Diploma Course would also deserve to be suitably amended by issuance of a fresh notification. The fresh modification / amendment notification would clearly incorporate / indicate therein that the recognition of PG Medical Diploma Course in question would be recognized only for the period from the grant of recognition till the date of stoppage / discontinuation of such PG Diploma Course of such applicant medical college/ institution. Thus, in 11(2) notification where such PG Medical course (which is discontinued / stopped by the concerned medical college / institution) would be recognized only when granted by a particular date and further mentioning therein that the conduct of such PG Medical course has stood discontinued by the applicant medical college / institution from that stipulated date. Issuance of such a modification notification issued by the Ministry of Health, Govt. of India would also be an imperative for the MCI to take timely action for the simultaneous request on behalf of each of such medical college / institution for consideration and for making suitable recommendations by the MCI for the appropriate increase in the admission capacity of the concerned PG Degree Course(s).
10. In case of medical college / institution where further admissions in the PG Diploma Courses already stand stopped / discontinued as per the applicable norms of the concerned university / deemed university / medical institution etc. if some of the students in the PG Diploma Courses who have not successfully completed the course within the period of 2 years but are required to be kept as enrolled student for some period as stipulated in the applicable rules of the university etc. (however, no further admission in the PG Diploma Courses are being made by such medical college / institution) it would also be appropriate that names of those few students can also be incorporated in the modification / amendment notification to be issued by the Central Govt. In this regard, it would be necessary for the applicant medical college / institution to provide the particulars of such students to the MCI as well as the Ministry of Health, Govt. of India.
11. The Ministry of Health, Govt. of India would issue such amendment / modification notification u/s 11(2) of the Act as set out above, and make a copy of the same immediately available to the college / institution concerned and also a copy of the MCI thereby facilitating and enabling the MCI to undertake the process for consideration and for making recommendation for appropriate increase in the annual sanctioned strength for the concerned PG medical degree in such medical college / institution.
12. It would also deserve to be emphasized that such mechanism should also be adopted in a uniform manner for such similar request which the MCI may entertain in future from other medical colleges / institutions. The decision of the PG Committee, which may be finalized in this behalf, would also deserve to be informed to all the medical colleges / institutions and would also be considered to be put on its website so as to ensure that there is uniform policy in this regard.

13. Having considered the above-mentioned aspects, the PG Committee decided as under :-

(i) The above-mentioned position be brought to the notice of the Ministry of Health, Govt. of India. The Ministry of Health, Govt. of India be requested / recommended to take the appropriate necessary action in the light of the background mentioned above, including the following :-

(a) In all those cases of medical colleges / institutions where on their applications for increase in PG degree seats (with the declaration and undertaking by the concerned medical college / institution that they have already stopped / discontinued imparting all medical education in PG diploma courses) and the inspections have been carried out on their furnishing an affidavit to this effect to the MCI, the Ministry of Health, Govt. of India to take necessary action of -

- Correcting the seat matrix of the sanctioned PG diploma seats by deleting therefrom the PG diploma courses stopped / discontinued by the concerned medical college / institution and to suitably amend the notification for recognition of such stopped / discontinued PG diploma courses by incorporating in the amendment notification that the recognition of such stopped / discontinued PG diploma courses will not be recognized after 2012 and further if any student already admitted prior to 2012 in such stopped / discontinued PG diploma courses but who have not yet qualified / passed in the PG diploma courses, their names should be incorporated in the amendment notification to be issued by the Ministry of Health, Govt. of India with the outer time stipulation before which date they must qualify in the stopped / discontinued PG diploma courses and whereafter, in any case, they will not be entitled to continue to pursue such stopped / discontinued PG diploma course, as per the applicable norms / stipulations of the MCI.

(b) Similarly, for all future applications, i.e. applications which are already received by the MCI but still to be considered for increase in PG degree seats (where the applicant medical college / institution has declared that it has stopped / discontinued PG diploma courses) and the further action by the MCI including the conduct of inspection etc. is still to be undertaken, the concerned medical college / institution would be required to approach the Ministry of Health, Govt. of India for necessary correction in the seat matrix of PG diploma courses by deleting the number of seats of PG diploma courses which are declared to be stopped / discontinued by the applicant medical college / institution and also for the modification of the recognition notification, as stated above, and making available to the MCI the corrected seat matrix of PG diploma courses and also the copy of the amended notification and it is only whereafter the MCI would get into a position for proceeding further with the application of any PG medical college / institution seeking to increase its PG degree seats, after having declared that they have stopped / discontinued PG diploma courses.

(ii) It is emphasized that the Ministry of Health, Govt. of India may kindly take appropriate action, as set-out above, as expeditiously as possible, thereby enabling the MCI to take the necessary action only after receiving

the above-mentioned communication / modified notification from the Ministry of Health, Govt. of India.

215. Consideration for one time extension in existing time schedule for completion of admission process for postgraduate medical course - reg.

Read: the matter with regard to consideration for one time extension in existing time schedule for completion of admission process for postgraduate medical course.

The Postgraduate Committee considered the matter with regard to consideration for one time extension in existing time schedule for completion of admission process for postgraduate medical course and noted that the Central Govt. had extended the time schedule for processing of PG applications and an application had been filed before the Hon'ble Supreme Court in Civil Appeal No. 4318 of 2012 for seeking permission to relax the time schedule stating that it would not affect the admission schedule in any manner.

In view of above, the Postgraduate Committee decided that it would not be possible to consider the revised time schedule as suggested by the Central Government and decided to follow the existing time schedule as prescribed in the Postgraduate Medical Education Regulation, 2000.

Meeting ended with a vote of thanks to the Chair.
